# Planned Preventative Maintenance Programmes agreed to suit your needs

Select from annually (a minimum to comply with Health & Safety Legislation), or more frequently as required. UK law requires all power operated door must be inspected and tested once per year as a minimum.

Hart Door System's Planned Preventative Maintenance customers benefit from the peace of mind that their doors have been reviewed from a design safety aspect, as well as having their current condition checked with any required safety improvements highlighted.

## Advantages:

- Ensure your doors are safe and that you are complying with Health & Safety Laws
- Ensure safe and reliable performance of your doors
- Prevent unexpected break downs and disruption to site operations
- Increase the life of the doors' working parts, saving money and energy costs
- Identify and resolve minor issues before they become significant
- Receive advice on technical advances that save energy and improve door operation

## Annual service standard check list:

Doors: Roller, sliding, folding, hinged manual or power operated and automatic.

### Level One: (One visit per year)

- Functional test door and all systems
- Ensure entrapment preventions are in place
- Look for damage and excessive wear on parts
- Check alignment
- Check guards are in place and undamaged
- Ensure fire automation systems are operational
- Issue of paperless, electronic report

### Level two: (Bi annually or more frequently as required)

- Some operational components are obscured within guards and covers requiring lifting equipment to access and carry out inspection. This would include roller doors where the roller is enclosed in a metal cover.
- This should be carried out at the start of an agreement and on an agreed frequency, based on usage and door type.

### Additional services for power doors:

- Electronic pressure test on leading safety edge and record result
- Ensure all safety systems are in place and functional.
- Check presence safety override brakes on vertically operating doors, historically this was not required, it is now and is a retrospective legally require fitment.
- Maintain records of activity each door
- Complete report and submit

## Hart Door Systems gives you peace of mind:

- Avoid costly breakdowns
- Improves safety
- Reduces downtime
- Extends the life of your door
- Compliance with health and safety legislation
- Improved Security
- Energy efficiency
- Prevent pollution and contamination

## Hart Doors, trusted by:

Access and lifting equipment is to be available appropriate to the site, free issue as required, instant availability facilitates efficient use of time and cost reduction. Ladders or steps are carried along with the necessary tools to complete most work however if they are not allowed to be used on site access and or lifting equipment will be hired at extra cost.
